## **THE STAR ON YOUR FURNITURE**

News collection 2021 by furnipart is a fresh start from several perspectives. The emphasis is on nearness, warmth and those little details that truly matter in the home.

In one way or another, we probably all need to wipe the slate clean in 2021. To start again from the beginning, or to look inside and nurture what is near and dear to us: the home – ideally with a dash of the familiar to convey a sense of calm in an uncertain, tumultuous time. This was our inspiration when putting together this collection.

# news collection 2021/

BY FURNIPART

The collection you are looking at right now is composed of designs created during a truly special year. In their own particular way, they mirror the needs that have arisen under extraordinary circumstances. As well as on looking to the future through new interpretations of familiar forms, the emphasis here is on nearness, warmth and the tactile.

Our new collection is an expression of the Zeitgeist in which it was born. There can be little doubt that we are all seeking calm and assurance – although assurance can express itself in a great many ways. Warmth and nearness are clearly evident in many of the new designs presented in this collection, but it also contains clear references to the Memphis Group and their playful, geometric shapes from the 1980s. A dash of retro can also give rise to assurance, while the shared references generate a sense of solidarity across national borders.

**Rattan** | **Design:** Kamper Form | **Index:** 91

The fabric-like pattern adds warmth to Rattan, while the feeling of it in your hand amplifies the sense of presence. The design immediately conjures up images of home and nearness.

# news collection 2021/

BY FURNIPART

Soft shapes and straight lines merge seamlessly to create this welcoming handle. The front appears almost elongated, adding a dash of softness and warmth to the design. It is nostalgic yet contemporary at the same time.

The Gate knob from the same range can easily stand alone, but handle and knob complement one another so sweetly that it would be a shame not to use them together.

Transit | Design: VE2 | Index: 93

Envelope | Design: VE2 | Index: 86

Envelope's precise lines imbue the design with a tight, compact expression. Functionality has been pared down to the bone here. At the same time, the angled grip surface makes the design delightfully attractive.

BY FURNIPART

There is something particularly reassuring about the organic shapes of this handle, which engender a sense of calm and harmony.

The overall expression spreads warmth – even when set against cooler, more modern décor – and it just goes to show how little is required to redefine the ambience in a room.

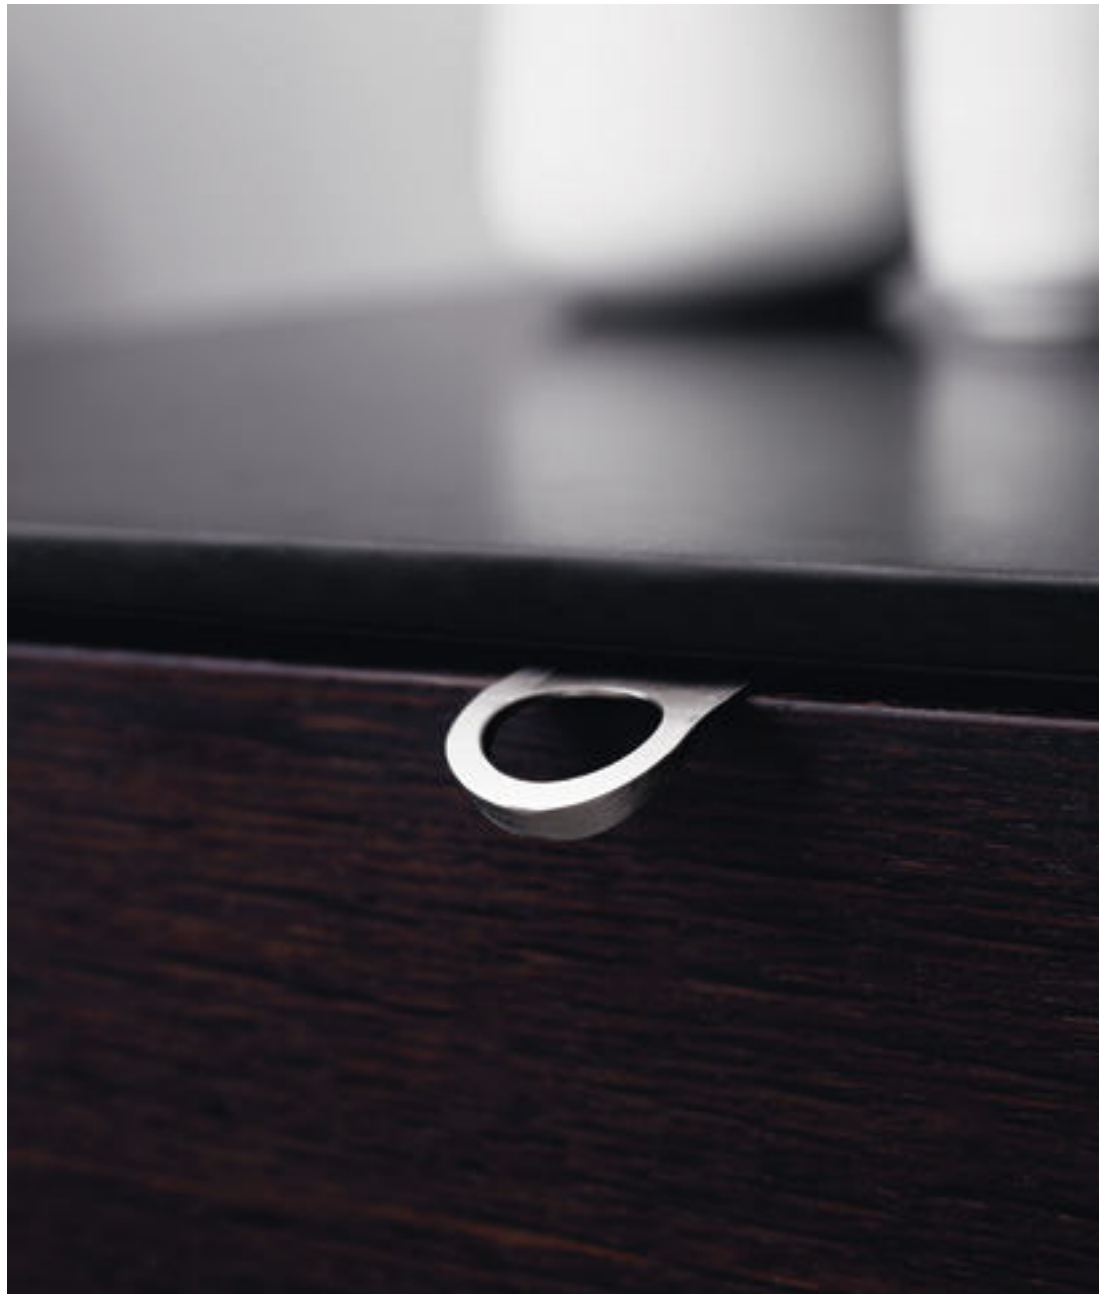

Span | Design: Neuhaus | Index: 93

Span | Design: Neuhaus | Index: 93

**Punch** | **Design:** Adam Laws | **Index:** 90

The perforated surface makes Punch light and discreet. The surface design also helps soften the otherwise tight expression, resulting in a simple handle that almost seems to smile.

Square | Design: furnipart | Index: 93

**Plato** | **Design:** Hans Sandgren Jakobsen | **Index:** 90

Square and Plato are part of our #furnipartclassics. However, these versions are not made of metal but of OceanIX. A material made by the Danish company Plastix based on post-use and obsolete input streams collected from the maritime industry, such as fishing nets, ropes and trawls. Using this material means less waste and a reduction in the CO2 emissions stemming from the use of new plastic.
