easi[®]

easi® easy to install
easy to connect
easy to control

easi® is a control system for D-Motion luminaires with a remote control with smooth lines and neutral colours that adapt to and blend discreetly and harmoniously into any setting.

The circular shape with rounded edges makes the handle particularly ergonomic and safe, also thanks to the synthetic rubber ring that wraps the remote control, increasing its grip and protecting it from accidental bumps.

The curved concave central button makes pressing easier.

easi® integrates a luminous LED ring synchronised with the remote control selectors.

Magnetic support

easi[®] is supplied with a support that can be screwed or stuck to the wall with double-sided tape. The base integrates a magnet that easily houses the remote control.

Remote control

The remote control operation is guaranteed by a specific LED Driver with integrated RF receiver. The remote control dialogues with the LED Driver, which in turn switches on and off and controls the colour and brightness of the D-Motion LED luminaires.

Easi Driver 36/72W 230V
