

# EFFEGIBREVETTI

## MICROWINCH

FEATURES AND ADVANTAGES

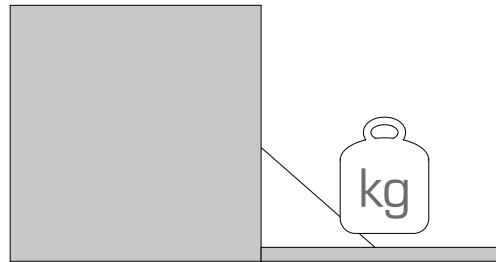

## Mechanism for flap doors opening downwards

### Main features:

- Flap heights from 210 cm to 480 cm
- Flap weights from 1,2 kg to 9 kg (depending from height)
- 4 available springs to cover various weight needs
- Minimum cabinet depth: 180 mm (horizontal) and 82 mm (vertical)
- Adjustable opening angle

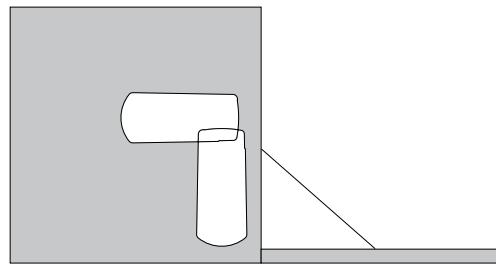

## Patented spring solution

### Advantages:

- It neutralizes the door weight during closing
- It does not work against the hinges (they don't need to be adjusted)

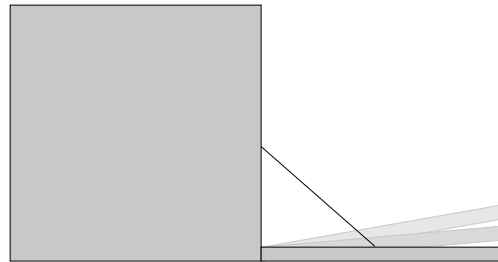

## Horizontal or vertical mounting

### Advantages:

- Flexible use
- It can be used for very narrow cabinets (bathroom furniture)

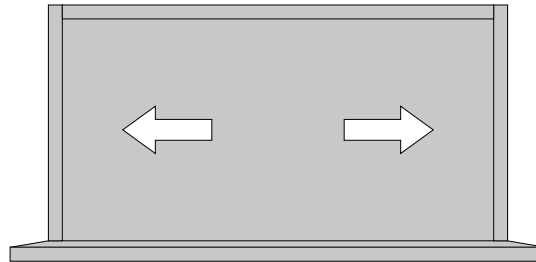

## Damping function on opening

### Advantages:

- Comfort for the consumer
- No breaking risk for furniture and fittings

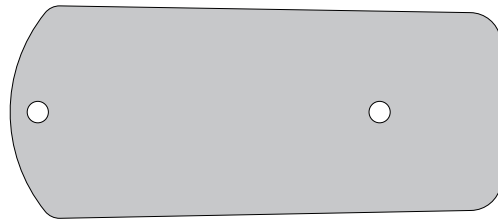

## Symmetrical construction

### Advantages:

- The same mechanism can be used both on the right and on the left
- Very easy to stock

## Fixation by drilling the cabinet side

### Advantages:

- No groove required
- Quick and intuitive mounting

## Fastening on door by screws

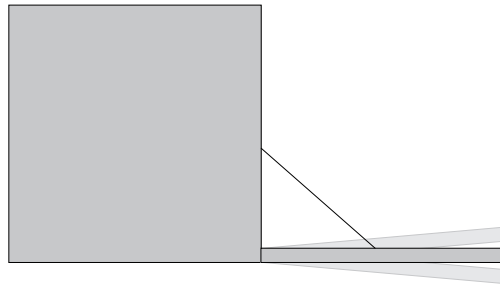

### Advantages:

- The flap hangers must only be drilled and screwed
- No groove required

## Wire-length adjustment

### Advantages:

- Door reaches easily the 90° opening position

Last but not least

## Advantages:

- Competitive price
- 4 different colours available
